

Calculator Mini Project Documentation

1. Title Page

Project Title: Calculator Mini Project

Student Name: T. Vinitha

Department: B. Tech CSE (Data Science)

College Name: [Annamacharya Institute of Technology and Sciences, Tirupati]

Academic Year: 2025-2026

2. Abstract

The Calculator Mini Project is a web-based application developed using HTML, CSS, and JavaScript. The calculator performs basic arithmetic operations such as addition, subtraction, multiplication, and division. The project provides a simple and user-friendly interface for performing mathematical calculations.

3. Introduction

A calculator is an electronic tool used to perform mathematical operations. This project demonstrates the use of web technologies to develop a simple calculator application. The application allows users to enter numbers and perform arithmetic calculations instantly.

4. Objectives

- To develop a web-based calculator.
 - To perform basic arithmetic operations.
 - To understand HTML, CSS, and JavaScript concepts.
 - To create an interactive user interface.
-

5. Technologies Used

Technology Purpose

HTML Structure of the webpage

CSS Styling and layout

JavaScript Calculator functionality

Technology Purpose

GitHub Project hosting

6. System Requirements

Hardware Requirements

- Computer/Laptop
- Internet Connection

Software Requirements

- Web Browser
 - GitHub Account
 - Text Editor (VS Code)
-

7. Source Code

HTML

```
<!DOCTYPE html>

<html>

<head>

  <title>Calculator</title>

  <link rel="stylesheet" href="style.css">

</head>

<body>

  <div class="calculator">

    <input type="text" id="result" readonly>

    <button onclick="clearResult()">C</button>

    <button onclick="appendValue('7')">7</button>

    <button onclick="appendValue('8')">8</button>

    <button onclick="appendValue('9')">9</button>
```

```
<button onclick="appendValue('/')">/</button>
```

```
<button onclick="appendValue('4')">4</button>
```

```
<button onclick="appendValue('5')">5</button>
```

```
<button onclick="appendValue('6')">6</button>
```

```
<button onclick="appendValue('*')">*</button>
```

```
<button onclick="appendValue('1')">1</button>
```

```
<button onclick="appendValue('2')">2</button>
```

```
<button onclick="appendValue('3')">3</button>
```

```
<button onclick="appendValue('-')">-</button>
```

```
<button onclick="appendValue('0')">0</button>
```

```
<button onclick="appendValue('.')">.</button>
```

```
<button onclick="calculate()">=</button>
```

```
<button onclick="appendValue('+')">+</button>
```

```
</div>
```

```
<script src="script.js"></script>
```

```
</body>
```

```
</html>
```

CSS

```
body {
```

```
    display: flex;
```

```
    justify-content: center;
```

```
    margin-top: 50px;
```

```
    font-family: Arial, sans-serif;
```

```
}
```

```
.calculator {  
    width: 250px;  
}
```

```
input {  
    width: 100%;  
    height: 50px;  
    margin-bottom: 10px;  
    text-align: right;  
    font-size: 20px;  
}
```

```
button {  
    width: 55px;  
    height: 55px;  
    font-size: 18px;  
    margin: 2px;  
}
```

JavaScript

```
function appendValue(value) {  
    document.getElementById("result").value += value;  
}
```

```
function clearResult() {  
    document.getElementById("result").value = "";  
}
```

```
function calculate() {

    let result = document.getElementById("result");

    try {

        result.value = eval(result.value);

    } catch {

        result.value = "Error";

    }

}
```

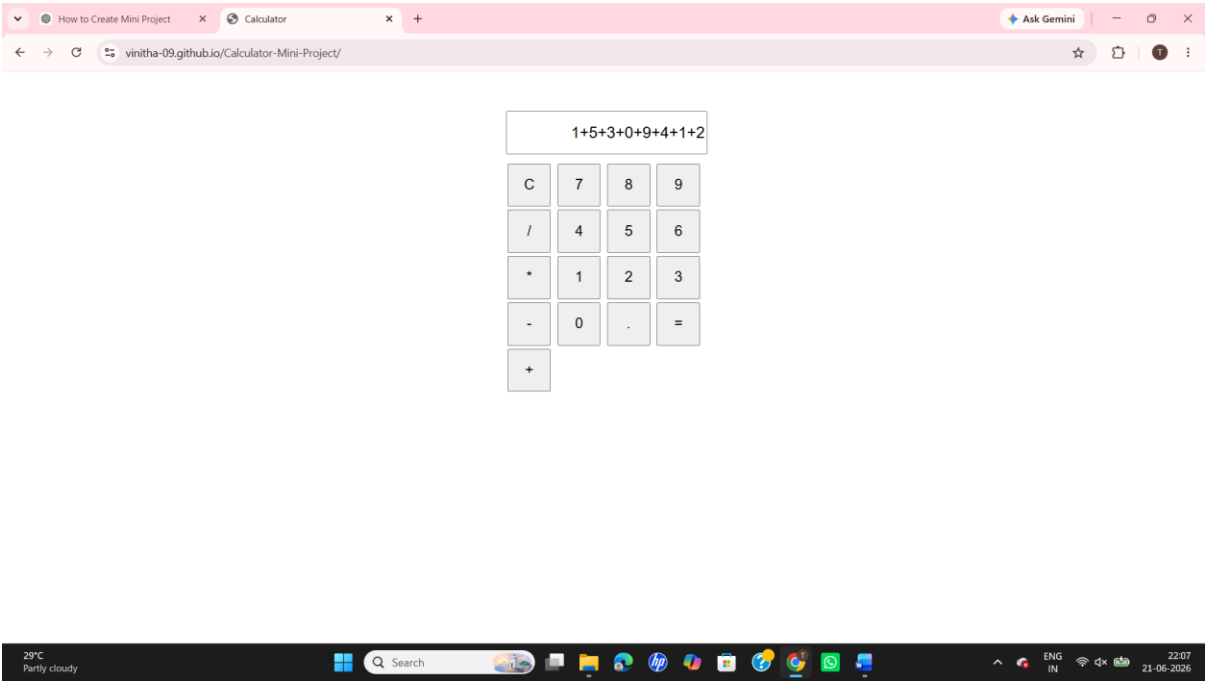

8. Output Screenshots

Insert the screenshots you uploaded to GitHub.

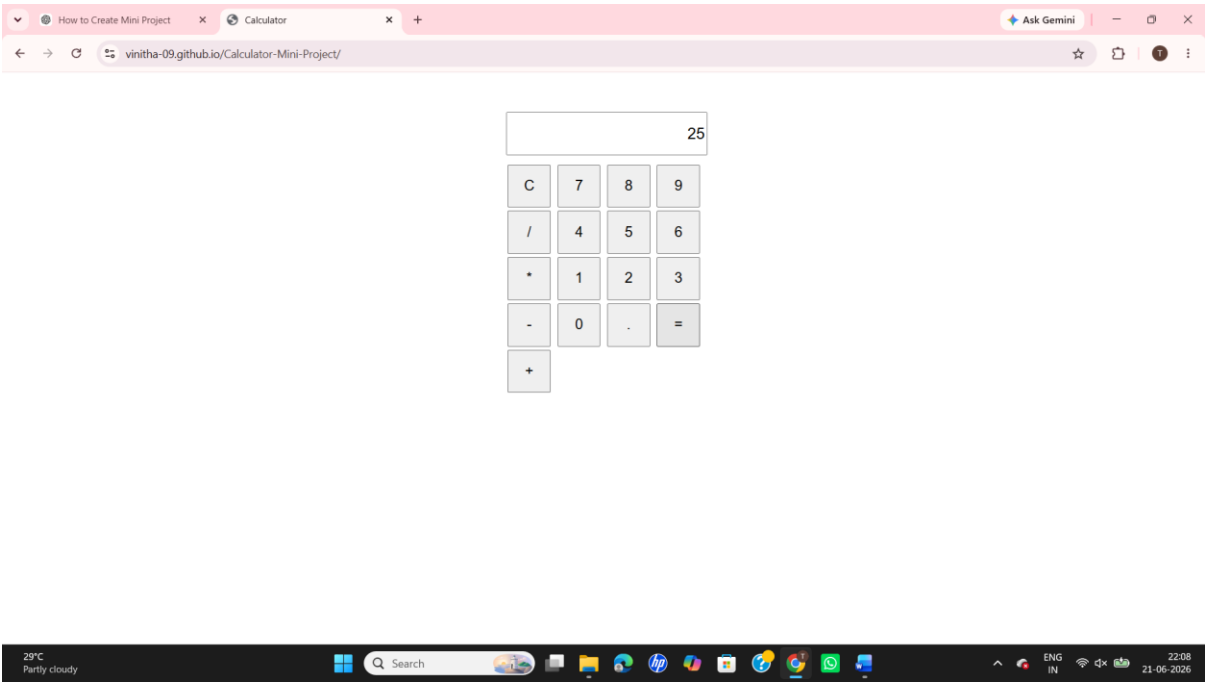

Screenshot 1

Screenshot 2

Screenshot 3

9. Advantages

- Easy to use
 - Fast calculations
 - User-friendly interface
 - Accessible through a web browser
-

10. Conclusion

The Calculator Mini Project successfully performs basic arithmetic operations using HTML, CSS, and JavaScript. The project helped in understanding front-end web development concepts and JavaScript functionality.
